If I don't have the original factory diameter for your particular roller in my data base, do you want me to add extra rubber to compensate for wear and age? If so continue.

Please check one or more as necessary as it applies to your roller:

The outside diameter should be ____.

_____ Make it the same diameter as the old roller.

_____ Please add .015 (match book thickness more rubber to the diameter it is now.

_____ If my roller is under or over size, Terry should correct it if he has it in his database.

_____ Please add .050 (thickness of a CD) more rubber to the diameter it is now.

_____ My old roller appears to be close to the right diameter but it would work better if it had new rubber on it.

_____ My unit works ok with the diameter the roller is now.

_____ I don't know what size to make it.

PLEASE INCLUDE THIS FORM WITH EACH WHEEL OR ROLLER.

Send rollers and direct questions to:
Terry Witt
13610 Krauskopf
Sparta Mich, 49345
United States
